SUMMARY

Software Engineer with experience building intelligent systems and data-driven applications. Strong foundation in machine learning, full-stack engineering, applied research and automation. Experienced in developing AI-powered tools including OCR pipelines, automated workflows, and scalable backend.

TECHNICAL SKILLS

- **Programming:** Python, Java, JavaScript, Kotlin
- **AI / Data:** Machine Learning, OCR Systems, Data Analysis, Model Evaluation, Agentic tools
- **Frameworks & Tools:** React.js, Node.js, Firebase, REST APIs
- **Databases:** MySQL, NoSQL

EXPERIENCE

Full Stack Developer

Emo Energy | Bengaluru | Jul 2025 – Jan 2026

- Built responsive React-based frontend interfaces and integrated them with Node.js APIs, improving performance by **35%** and supporting **1,000+ active users**.
- Designed and integrated **RESTful APIs**, reducing latency and improving data reliability.
- Collaborated asynchronously with cross-functional teams via **Notion, GitHub**, contributing to **7+ feature releases**.

Full Stack Development Intern

Emo Energy | Bengaluru | Jan 2025 - Jun 2025

- Optimized existing applications, improving system efficiency by **30%**.
- Debugged and resolved **10+ critical issues** across frontend and backend layers.

Research & Development Intern

Centre for Research Projects, CHRIST University | Jun 2024 - Oct 2024

- Conducted applied research and statistical analysis to improve research accuracy by **15%**.
- Promoted research initiatives to enhance visibility through **5+** community interactions and workshops.

PROJECTS

ParkAware – AI-Powered Parking Conflict Resolution System | ([GitHub](#))

- Developed a mobile application enabling **number-plate scanning and anonymous notifications**.
- Integrated **OCR** extraction with Firebase database for real-time data retrieval.
- Achieved **~90%** recognition accuracy using image preprocessing techniques.

Learn2Lead – E-Learning Platform | ([GitHub](#))

- Created an e-learning platform with 6 modules including assessments, progress tracking system, and Pitch IT system where students can present their ideas to potential investors.
- Integrated **Stripe payment gateway** and implemented backend using **PHP & MySQL**.

EDUCATION

BCA – Computer Applications

CHRIST (Deemed to be University), Bengaluru | 2022 - 2025 | GPA: 3.7

CERTIFICATIONS

- **Research Publication** – “ParkAware: An Innovative Solution for Solving Unauthorized Parking Issues”, IJARESM (Impact Factor: 8.536), Feb 2025
